**Accompanying audio file:** REH1-004.wav

### **Description:**

The tables below present the set of adverbial demonstratives in Northern East Cree. The tables present orthographic forms from CCLAS transcripts as well as Junker and MacKenzie (2003), which is the only source I found that provides a complete list of adverbial demonstrative forms for Northern East Cree.

However, there is a difference between the forms in CCLAS data and those presented by Junker and MacKenzie: In the Extended paradigm for both Set One and Set Two adverbials, Junker and MacKenzie do not include a final <h> (e.g., they write < utâ> instead of < utâh>). The adverbial forms in CCLAS data, which are also the forms recognized by Margaret, include this final <h>.

Therefore, these forms from Junker and MacKenzie are included in the tables, but I crossed them out following the discussion with Margaret. An in-person discussion with Margaret and M. MacKenzie on June 1, 2018, confirmed that these forms without final <h> are simply a difference in spelling conventions.

Each orthographic form below is accompanied by an IPA transcription, based on Margaret's pronunciation in the audio file REH1-004.wav. The <'> indicates where I think I hear the primary accent (i.e., higher pitch)—I'm using the terminology from NEC literature. Anyone who wishes can double-check this with the audio recording.

### **Set One: Adverbials**

	<i>Static (Restricted)</i>	<i>With movement (Extended)</i>
<i>Proximal</i>	1. utih [ʊtʰ]	<del>2. utâ</del> 3. utâh [ʊ'dah]
<i>Distal</i>	4. anitih [ɛntʰ]	<del>5. anitâ</del> 6. anitâh ['endah]
<i>Remote</i>	7. nâtihi [natʰ]	<del>8. nâtâ</del> 9. nâtâh ['nadah]

### **Set Two: Adverbials**

	<i>Static (Restricted)</i>	<i>With movement (Extended)</i>
<i>Proximal</i>	1. mâutih [maʊtʰ]	<del>2. mâutâ</del> 3. mâutâh [maʊ'dah]
<i>Distal</i>	4. mânitih [mantʰ]	<del>5. mânitâ</del> 6. mânitâh ['mandah]
<i>Remote</i>	7. mânâtihi ['manatʰ]	<del>8. mânâtâ</del> 9. mânâtâh [ma'nadah]
